

# JavaScript Development Labs

---

## JavaScript Assignment 1

Due Date 02/24/2014

---

Write a JavaScript webpage that displays your name and then on a separate line displays your favorite color. For example, if we ran Wilma Flintstone's program, we might see:

Hello! My name is Wilma Flintstone.  
My favorite color is white.

Submit your final web page using D2L.

## JavaScript Assignment 2

Due Date 02/24/2014

---

Write a JavaScript webpage that asks the user for the name of their favorite movie and then alerts the name of the movie followed by the phrase *is a cool movie*. For example, if the program output is in **boldface**, and the user input is in *italics*, then a run of the program might be:

**What is your favorite movie?** *The Princess Bride*

And the popup alert would say

**The Princess Bride is a cool movie.**

Submit your final web page using D2L.
